

**May 25, 2005**

**The Massachusetts eHealth Collaborative (MAeHC) has invited seven EHR vendor finalists to move to the contracting phase of our vendor selection process.**

The seven finalists are:

1. Allscripts
2. eClinicalWorks
3. GE Healthcare Technologies
4. MEDITECH
5. NextGen Healthcare
6. Physician Micro Systems, Inc.
7. Wellogic

We received many exceptional proposals and thank all respondents for their time and effort.

While there are many highly capable systems available on the market, our selections reflect a demanding set of criteria related to the pilot projects. The main criteria that we used to evaluate the proposals were: corporate stability, functionality, data exchange, integration, Massachusetts installations and price to meet the specific MAeHC and pilot community requirements. We have attached a more detailed description of the criteria and process used for the vendor selection.
